Explanation

The decrease in the end user price for Mogas 95 is the result of a substantial decrease of the purchase price in combination with an increase in the correction of the Surplus/Deficit component. The increase of the end user price for Gasoil LSD is the result of an increase of the purchase price in combination with a decrease in the correction of the Surplus/Deficit component. These price developments - including the divergent development between Mogas and LSD - are in line with the international ratings, whereas developments since September again demonstrate price increases and in particular with regard to diesel products in a very steep manner.
