#### Explanation

Although the purchase price of Mogas 95 increases, the end-user tariff for Mogas 95 decreases as a result of a decline in the correction of the surplus/deficit component. The end-user tariff for Gasoil LSD increases mainly as a result of the implementation of the second half of the increase of the purchase price of last month and due to an increase in the purchase price, which is in line with Platts. To prevent a too steep tariff fluctuation for Gasoil LSD, the increase of the purchase price will be mitigated again through a negative correction in the surplus/deficit component. This mitigating measure will have to be corrected in the coming months.
