End user price	2.5013	1.9109	80.00	16.00
<b>Price at the gas station</b>	2.501	1.911	80.00	16.00

### Explanation

International prices for oil and fuels have been continuously increasing since June 2023. Although the purchase price of Mogas 95 decreases nevertheless, the end-user tariff for Mogas 95 increases as a result of a strong increase in the correction of the surplus/deficit component. The end-user tariff for Gasoil LSD increases mainly as a result of a sharp increase in the purchase price, which is in line with Platts. To prevent a steep tariff fluctuation for Gasoil LSD at once, the increase of the purchase price will be implemented in two steps by means of a negative correction in the Surplus/Deficit component. However, this mitigating measure will have to be corrected in the coming months. LPG prices remain the same. The components 'Fuel Supply Guarantee' are adapted slightly after which the pre-financing by RdK and Curoil regarding the costs related to the use of the infrastructure on the refinery premises has ended completely.
