D Irrigation water	≥ 0	3.5000	4.1817	**7.6817**	3.5000	3.8668	**7.3668**

Explanation

The decrease in electricity tariffs is primarily due to lower projected electricity generation and reduced operation of diesel power plants in November 2026 compared to October 2026, despite an increase in fuel prices and the correction factor for the month of September 2026. In addition, the shortfall resulting from the application of the 10% cap on the electricity tariff increase in October 2026, in accordance with the guidelines, is incorporated into the correction factor for November 2026.

The decrease in the water tariffs results from lower electricity costs for water production, combined with a decrease in the correction factor for the month of September 2026.
